

Pizza Billing Web Application

Developed by: M.G.H.C.B.Madawala

Date: August 2025

1. Project Overview

The Pizza Billing Web Application is a lightweight, browser-based tool designed to help pizza shop staff manage customer billing efficiently. It includes features for selecting items, calculating totals, applying discounts, and printing invoices.

2. Key Features

- Item management with price and quantity selection
- Invoice generation with subtotal, discount, and total
- Cash input and balance to return calculation
- Remove individual items and reset invoice
- Print-friendly layout with header, logo, and shop info

3. Screenshots
